

REAL · MUN

Walk into your next MUN already knowing how it'll feel.

Built by Ayaan Dhuria · 9th Grade · 2 years of Model UN · Best
Delegate & Honorable Mention

YOUTH CODE × AI HACKATHON 2026

Most delegates walk in unprepared — and it's not their fault.

No realistic practice

There's no way to rehearse a committee before the real thing.

Feedback comes too late

Dais feedback only arrives after the conference is already over.

Coaching is a privilege

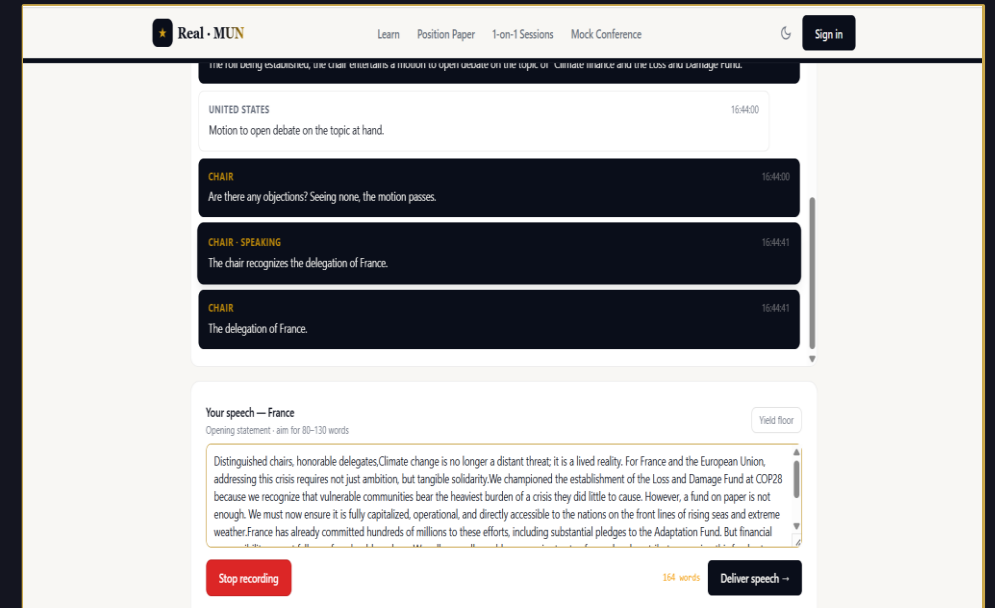

Good MUN coaching is expensive and locked behind elite schools.

“It was my third conference, and I looked around at delegates sitting in complete silence — not because they had nothing to say, but because no one had ever shown them how. It took me right back to my own first committee, when I was the quiet one too. That's when I knew I could build something to help people understand Model UN before they ever walk into the room.”

THE SOLUTION

Real-MUN lets you rehearse the whole experience — with AI.

A free platform where any student can practice unlimited mock committees and get instant, expert-level feedback — as many times as they need.

WHAT IT DOES

Everything you need to be ready.

Mock Conference

A full 30-minute committee with an AI Chair and three AI delegates you speak to out loud.

Speech & Session Feedback

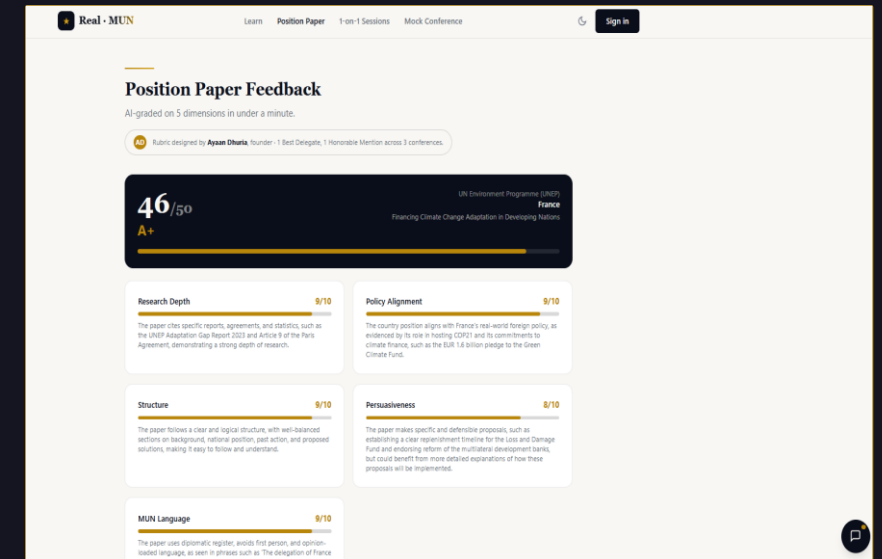

Judged like a real Dais — with specific, line-by-line rewrites.

Position Paper Feedback

AI scores your paper across five dimensions in under 60 seconds.

Learn the Basics

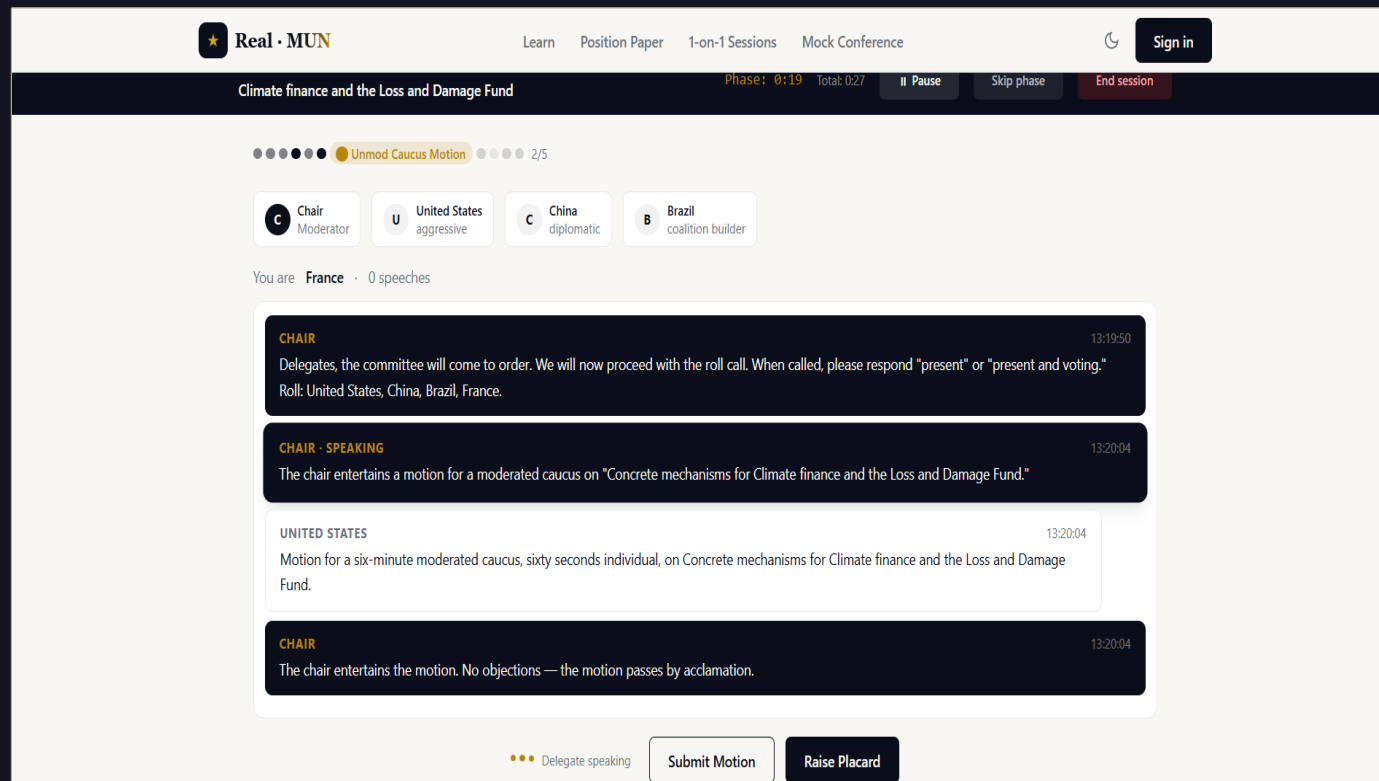

Procedure, vocabulary, and fundamentals for first-timers.

See it in action.

real-mun.vercel.app

A full mock committee — live.

HOW IT WORKS

Real procedure. Real foreign policy. Real feedback.

Deterministic procedure engine

Authentic MUN parliamentary flow runs the same way every session.

Country-accurate AI delegates

Each delegate argues from its nation's real foreign policy and persona.

Full voice interface

Speak your speech out loud — and hear the whole committee respond.

Built with Next.js · React · TypeScript · large-language models with automatic multi-provider failover · deployed on Vercel.

How Real-MUN works

01

The Chair

A neutral AI moderator who runs procedural phases, calls on delegates, manages time, and keeps things moving. Speaks with Edge TTS voice for realism.

02

Three AI delegates

Each has a country, a persona (diplomatic, aggressive, coalition-builder, technical, or quiet), and a system prompt grounded in real foreign policy.

03

You

You represent a country of your choice. Raise your placard, submit motions, give speeches, and build coalitions — just like a real committee.

04

The overseer

A quality layer that trims delegate speeches for length, strips off-character output, and keeps every turn sounding like a real MUN committee.

IMPACT

Practice shouldn't be a privilege.

\$0

Cost to students

Free and unlimited — no barrier.

10+

Delegates already tested it

Validated by real MUN participants.

For students at schools with no MUN program, no coach, and no budget.

Walk in ready.
